TOPIC: ISBN 978-88-8041-128-4

The Authors and Editors have made every effort to ensure the accuracy of the information contained in this journal, particularly with regard to medical procedure, drug selection and dosage. However, appropriate information sources including pharmaceutical producers and referenced material must be consulted, especially for drugs and/or medical procedures. The Editor will not accept papers where the ethical aspects are open to doubt.

COVER: The illustration, created at the Centers for Disease Control and Prevention (CDC), reveals ultrastructural morphology exhibited by coronaviruses. Note the spikes that adorn the outer surface of the virus, which impart the look of a corona surrounding the virion, when viewed electron microscopically. A novel coronavirus, named Severe Acute Respiratory Syndrome coronavirus 2 (SARS-CoV-2), was identified as the cause of an outbreak of respiratory illness first detected in Wuhan, China in 2019. The illness caused by this virus has been named coronavirus disease 2019 (COVID-19) (30 January 2020).
